

GOLDFIELD HAS A GREAT FUTURE

So Declares T. C. Dobbins, a Prominent Broker of the New Eldorado.

KENDALL STRIKE STILL SENSATION OF HOUR
Nine Tons, Averaging More Than a Hundred Thousand Dollars Extracted.

T. C. Dobbins, of the brokerage firm of T. C. Dobbins & Co. of Goldfield, Nev., after a trip to Los Angeles, Cal., is a visitor to Salt Lake City. His visit at this time is for business purposes, and after a few days he will return to the great southern Nevada gold camp. Mr. Dobbins is confident of the future of Goldfield and has no hesitancy in expressing his views.

Wildcaters Thing of Past.

"The camp of Goldfield," said Mr. Dobbins Monday at the Knutsford hotel, "has settled down to a good, solid business proposition. The 'wildcat' element is a thing of the past, and values are steadily increasing."

Kendall Has Rich Strike.

"The phenomenally rich find made on the Kendall property recently is still the sensation of the hour. The Kendall is located just north of the famous Sandstorm property. The great find was that of very rich ore in the bottom of a new shaft at a depth of sixty feet. A hoist for this shaft has been ordered, and the work of sinking the shaft to a greater depth is being pushed as rapidly as possible. This wonderfully rich stuff was from a small stringer discovered in sinking the shaft. Nine tons of ore, averaging value stated, were extracted and placed in the vault of the John S. Cook & Son's bank for safekeeping. The ore is thoroughly impregnated with free gold, which can be seen with the naked eye. A ten-inch streak has also been uncovered in the new shaft, and it is estimated that the value of the ore is about \$200,000. The work on the old shaft is also progressing satisfactorily."

Black Butte Also Looks Good.

"The Black Butte property, at Diamondfield, also came to the front recently with a good strike, are running \$200 a ton having been found on the surface on a section of the property which had until recently been given little attention. The Red Top mine is looking up especially. Fully 100 tons of ore, more than two hundred feet, and there is an immense amount of shipping and milling ore blocked out. There is about 100,000 tons of shipping ore on the dumps, but this will not be conveyed to the smelters until there is a reduction in the freight rates."

Expiration of Reilly Lease.

"The famous Reilly lease on Florence property is a thing of the past. It has recently expired. Its life covered a period of one year, and during that time the sum of \$200,000 was extracted. Joseph Reilly, John W. McKane and Jack Camp, who were the owners of the lease, practically all this vast amount of gold was taken from the lease during the last few days of its life, the lessees getting but little for many months. When the lease expired there was uncovered in the bottom of the shaft more than a hundred and fifty feet down, a three-inch string of almost pure gold. Payers were actually using in extracting the yellow metal."

Goldfield's Weekly Output.

"The weekly output of Goldfield now averages about \$200,000, and there is every indication that it will continue to increase. Things in the Bullfrog district are comparatively quiet, while the Tonopah district is holding its own as a producer."

WYOMING OIL FIELDS.

Harry Joseph Returns After Making Survey of Lands.

Harry Joseph returned to Salt Lake City Monday morning from a survey of the oil fields in Wyoming. He will be here Saturday to make a survey of the ground held by the Standard Reserve Oil company of Chicago in connection with the efforts of the company to secure a patent for the land. The company controls 1,000 acres and with an area of 100 acres it has developed three large producing oil wells.

It appears that the company failed to secure a patent on the land, as it was found to contain oil deposits, and as a result another outfit of capitalists are alleged to be now trespassing upon the property. The alleged trespassers are reported to have erected an apparatus near the biggest well developed by the Chicago concern with a view of tapping the flow. For this reason, it appears that the Standard Reserve is now seeking to secure a patent to the ground and exclude the alleged intruders.

Mr. Joseph states that the biggest well developed has a flow of fifty barrels of oil a day, and has a depth of more than 12,000 feet. The company, he says, to lay a pipe line from the oil wells to Leroy, Wyo., a distance of six miles.

Boston Copper Market.

James A. Pollock & Co. received the following message Monday, over their private wire, from Boston:

"Business in the local market is on the increase. Today's buying has been the best we have seen in the market for several years past. Copper shares were in great demand and prices climbed to new high marks in many instances. The scarcity of metal is now being used as the real factor in evidence. Prices were active and strong and at their best at the close."

New Mining Company.

The Castro Greaser Mining company has filed articles of incorporation in the office of the County Clerk. The company is capitalized for \$1,500,000 in \$1 shares. The officers are: J. P. Buzan, president; C. Moore, secretary and treasurer. The company owns a group of claims at Bingham and also owns mining property in Carbon, Emery and Wasatch counties.

More Smoke Suits.

W. L. Turner has filed actions against the United States Smelting company and the Bingham Copper and Gold Mining company to collect for damages alleged to have been done by smelters. The amount asked in each case is \$350.

Herb W. Edwards Injured.

Herb W. Edwards of Des Moines, Iowa, got a fall on an icy walk last winter, spraining his wrist and bruising his knees. "The next day," he says, "they were so sore and stiff I was afraid I would have to stay in bed, but I rubbed them well with Chamberlain's Pain Balm and after a few applications all soreness had disappeared. I feel that this bottle of Pain Balm saved me several days' time, to say nothing of the suffering." This liniment is for sale by all leading druggists.

MAKES AN INSPECTION OF MAY DAY PROPERTY

President Darmer Says Station Has Been Cut at Five-Hundred-Foot Level.

J. E. Darmer, president and manager of the May Day Mining and Milling company, returned Monday from his weekly inspection of the property at Eureka. Mr. Darmer states that a station has been cut at the 500-foot level in the shaft, and that drifting has begun. This station is a hundred feet lower than any other working in the mine.

Has a Hard Formation.

The drifting will be done to catch the vein from which the miners have been extracting ore on the 500-foot level. The formation through which the drifting will be done is a very hard lime. It is not known at present just how much work will have to be done to catch the vein. It is probable that about seventy-five feet may have to be covered, but it is certain that it will not require more than two hundred feet of work to get the vein.

What Uncle Sam Secured.

It was at the 500-foot level that the Uncle Sam company, the property of which adds the May Day, got its best values from the vein.

OPERATIONS MAY BE RESUMED
Officials of American Osmekite Company to Inspect Property.

R. L. Butler, president of the American Osmekite Mining company and president of the Pioneer sampler, with Secretary Rockledge of the latter concern, will go to Soldier Summit and Cotton in Summit county, today for the purpose of making an inspection of the property of the first-named company, with a view to the resumption of operations. Considerable work has been done on the property, operations being suspended last summer. The work is being pushed as rapidly as possible. It has a market value of \$100.

Tonopah-Goldfield Stocks.

James A. Pollock & Co. bankers and brokers, 110 South Main, today received the following quotations for mining stocks:

Will Declare Dividend.

E. H. Mead of the Beck Tunnel Consolidated announced Monday, after a conference with President Knight, that the company will declare a dividend of one cent a share next month, "just to give the stockholders some Christmas money."

Mining Notes.

Manager Harry Joseph of the Silver Shield Mining company left Monday night for Bingham to make an inspection of the company's property at that camp.

C. M. Dupont and Chance McKendrick of the Horner Mining company, the property of which is located at Tooele, Utah, are in the city.

Mining Engineer James Quinn, superintendent of the Buckhorn Ophir Mining company, has returned to Salt Lake after an inspection of several properties near Elko, Nev.

JAPAN IN MANCHURIA

Baron Komura Goes to Arrange With China.

VICTORIA, B. C., Nov. 27.—The steamer Athenian brought advices today that Baron Komura was recently sent as special ambassador from Japan to Peking as commissioner to make certain arrangements to secure Japanese domination in Manchuria, as well as to make a general post-bellum readjustment. Japanese publicists are afraid that Peking will shortly be again a center of intrigue and they are a unit in demanding Japanese occupation.

Count Okuma in a recent speech, after stating that China was unlikely to do anything on its own account, said Japan's magnanimity alone should govern the disposition of Manchuria. China was not entitled to demand retrocession and there should be military occupation by Japan, as Russia occupied the province. Trade regulations in Manchuria are sought by Japan to conserve the trade of the province.

ANOTHER BUSY DAY AT CAMP HAD ON 'CHANGE

Afternoon Transactions Are Largest in More Than Two Years.

BIG BULL MOVEMENT IS VERY APPARENT

Mr. Newhouse's Prediction as to Boston Con. Coming True.

Things were again strenuous on the stock exchange Monday, the transactions being the largest that has characterized a single session in more than two years. Although the number of shares sold did not exceed that of Saturday, the certificates that changed hands were of a greater value and the amount of money involved exceeded that of Saturday by a little more than \$200. The number of shares sold Saturday was 32,025, representing \$15,453.25, as compared with 19,425 shares, representing \$15,635.75, sold at the Monday afternoon session. At the Monday morning session, 24,158 shares, representing \$9,095.50, changed hands, making a total for the day of 43,599 shares, representing \$32,765.20.

Bull Movement Apparent.

There was a decidedly bull movement apparent all day Monday, all stocks having an upward tendency. The board opened quiet in the morning and closed strong in the afternoon. Beck Tunnel opened the day at 35, four points higher than the bidding price Saturday, and the price of the stock was 35 1/2 at the close of the day. Little Bell attracted the greatest attention of the day, advancing from 15 1/2 to 16 1/2, the price that prevailed Saturday, to \$2.00 per share. This stock was in great demand, but only a few shares changed hands.

Prediction Coming True.

The performance of Boston Consolidated makes it clear that Mr. Newhouse's recent prediction that the stock would soon cross the \$35 mark will be fulfilled. Saturday 19 1/2 was bid for the security, while \$20.50 was asked. Monday \$21.50 was bid for the stock and \$22.50 was asked. Carlin is holding its own at its increased price of Saturday, which is attributable to the steady improvement in the mine, as well as shipments. The closing quotations of the Monday session follow:

Stock	High	Low	Open	Close
Alhambra	42	40	41	42

Japanese publicists are afraid that Peking will shortly be again a center of intrigue and they are a unit in demanding Japanese occupation.

Count Okuma in a recent speech, after stating that China was unlikely to do anything on its own account, said Japan's magnanimity alone should govern the disposition of Manchuria. China was not entitled to demand retrocession and there should be military occupation by Japan, as Russia occupied the province. Trade regulations in Manchuria are sought by Japan to conserve the trade of the province.

BINGHAM PROPERTIES RESUME OPERATIONS

Railroad Situation at Camp Is Improved, According to Report.

According to reports from Bingham, the situation in connection with temporary suspension of operation at some of the properties in that camp, due to a breakdown in the equipment of the Copper Belt railroad, was greatly improved Monday. It was reported that with two engines, one of which was taken Sunday to the camp from Salt Lake, the railroad was able to resume the transportation of ore from the mines. It is understood that the railroad company will put on additional equipment as soon as possible.

Smelter Running Full Blast.

The Yampa smelter, below the town, resumed full blast operation Monday, after several days of reduced work, on account of the accident on the railroad. With a like amount of ore that was transported Monday from the mines to the smelter, the plant will be able to operate all furnaces, according to the reports from the camp.

Will Rush Work.

All the excavation work in connection with the addition to be made to the plant has been completed, and the laying of the foundations for the new buildings will be commenced Monday. Joseph Dederichs, who is in charge of the work, went to Bingham Monday, with a view of rushing the construction of the buildings as rapidly as possible.

Pembroke Stationery Co.

Are headquarters in the West for surveying instruments, engineering and architects' supplies; also blue printers.
